PROFILE

I`m a communicative, intelligent, reliable student with lots of energy who wants to grow up as a Front-end developer. I love sport, learning, coding, and art. I always move towards my goal overcome all obstacles.

PROJECTS

Social network: It`s an ordinary social network with profile page where you GitHub can make posts. Everyone has a description of his personal page and able to change it. You can send messages to people and follows them. But before using you should be authorized on login page. Based on social-network.samuraijs.com API.

Technologies: react-redux, TypeScript, Thunk, Axios, Formic, yup, CSS

Weather search: It's a site where you can write city name and it returns GitHub weather forecast for 5 days in this location. Based on AccuWeather.com API.

Technologies: react-redux, JavaScript, Thunk, Axios, Formic, yup, CSS

EDUCATION

February - June 2021	**Online Course (Way of Samurai)** React, Redux, TypeScript, Thunk, Axios, npm
